

CALL FOR PAPERS

4th AIMA World Conference on Management Accounting Research Monterey Peninsula, Northern California, May 16-17, 2019

Co-Chairs: Mary Malina and Laurie Burney

BACK BY POPULAR DEMAND

After a three year hiatus, *Advances in Management Accounting* is bringing back its World Conference on Management Accounting Research. It is designed as a small, unique research conference providing for rich discussions among 50-75 attendees in the beautiful Monterey Peninsula. The conference will include concurrent sessions along with plenaries by global leading academics. Accounting researchers are urged to submit papers for possible presentation.

HYATT REGENCY RESORT IN MONTEREY PENINSULA

Situated above Monterey Bay, Hyatt Monterey offers a complete resort atmosphere complimented by the dramatic scenic beauty and unique charm of John Steinbeck's Cannery Row. Monterey offers the following:

- ❖ Quaint Carmel-by-the-Sea
- ❖ Tours of Monterey wineries
- ❖ The majestic Big Sur coastline
- ❖ Award-winning Monterey Bay Aquarium
- ❖ Fisherman's Wharf
- ❖ World-famous 17-Mile Drive

Rooms will be offered at a discounted rate of \$209 (single or double occupancy) for conference participants (plus taxes and service fee). The conference fee is expected to be approximately \$400.

CALL FOR PAPERS

AIMA is focused on advancing management accounting by publishing quality, thought-provoking articles utilizing a broad set of research methodologies. We are seeking thoughtful, high quality papers on a variety of current topics in management accounting, broadly defined. In addition to more traditional research papers, we welcome early stage ideas, frameworks, replications, and meta analyses. *AIMA* will publish some selected conference papers in future issues.

Topics considered for the conference include, but are not limited to:

- ◆ Strategy implementation and coordination with organizational structure, management systems and managerial behavior
- ◆ Finding solutions to the problems identified in the actual implementation of performance measurement systems

- ◆ Analyzing the conditions under which selected performance measurement and management control systems are more or less effective
- ◆ The state of the art of non-financial performance measures
- ◆ Cross-border and cross-culture differences in the use and impact of management control and performance measurement systems
- ◆ Research that spans the gap between management accounting and management
- ◆ Evolution in the use of management accounting research paradigms

We are open to a broad set of research methodologies. Authors are encouraged to provide abstracts or expressions of interest by October 15, 2018 to allow for some early feedback for final preparation of papers.

INSTRUCTIONS FOR CONTRIBUTORS

Deadline for Submissions: Jan 15, 2019

Notification of Acceptance: by Feb 15, 2019

Email submissions to: Mary Malina at mary.malina@ucdenver.edu
