

The *Journal of Management Accounting Research* (JMAR) is pleased to announce the forthcoming

**SPECIAL INTEREST FORUM ON
SURVEY RESEARCH**

The Special Interest Forum explores how rigorous and innovative survey-based research extends our understanding of important questions and provides a valuable method for the testing of theory. Such research will help steer the future direction of management accounting research and facilitate the development of new theories, providing interesting insights that either shed thought-provoking new light on inferences of prior research, or that reveal real-world phenomenon in need of additional research. Discussion articles set forth best practices for the 'doing' of survey research and examine methodological issues associated with such studies.
