

Management Control Association

The 10th Management Control Research Conference Doctoral Colloquium will take place at and in cooperation with the University of Antwerp, Belgium 6th – 7th September 2016

Faculty:

Eddy Cardinaels (KU Leuven, Belgium and Tilburg University, Netherlands), **Anne-Marie Kruis** (Nyenrode Business University, Netherlands), **Kari Lukka** (Turku School of Economics, Finland) and **Alexandra Van den Abbeele** (KU Leuven, Belgium)

The Management Control Association (MCA) encourages PhD students to become active members of its diverse community of management control scholars. Applications are invited from doctoral students across the international management control community.

The doctoral colloquium provides a platform for students working towards their doctorates to interact with, and learn from fellow students and scholars in various areas of management control research. The warm, constructive environment encourages participants to engage in in-depth discussions on research design and methodologies with established scholars. It enables them to review their projects with the help of fellow participants and senior scholars who work in the area of management control - and students are required to actively participate. The colloquium also provides a number of networking opportunities.

The colloquium is offered to students at any stage of their research involved in qualitative, quantitative or mixed-method doctoral research in the area of management control, broadly defined.

To apply:

1. Doctoral candidates are encouraged to submit an abstract (500 words maximum) to elaine.harris@roehampton.ac.uk by 31st March 2016.

Your application should be saved as a Microsoft Word file (.docx or .doc) and must contain the following:

Complete contact details, including name, University affiliation, email address and telephone number.

A sentence describing your stage in the doctoral program (e.g., 2nd year approaching data collection).

A summary of the doctoral dissertation project, including title, research question, theoretical framing, and research design. How data has been – or will be – collected and analyzed.

2. A letter headed endorsement from your supervisor is required.

3. Applications that do not adhere to these guidelines will not be accepted.
